

# Color Box Painting's Roof Coating Process

## Step 1: Clean the surface

Clear roof surface of loose debris including dirt, gravel, sticks, etc. using a broom or blower. Wash away surface dirt with a pressure washer.

### Recommended Surfaces:

Metal

Urethane / Polystyrene Foam

Concrete Roof

Aged Rolled Roofing, existing aluminum and white coating

Flat and barrel cement tile

## Step 2: Repair and Reinforce

Patch and repair cracks, blisters, and other problem areas with roof patch or roof sealant following manufacturer's directions. Reinforce with patching fabric.

**Patching material:** brush or trowel as indicated on container instructions.

**Elastomeric coating:** Roof brush,  $\frac{3}{4}$ " nap roller, or airless spray.

## Step 3: Apply Elastomeric Coating

Cut in along edges, then move from one end of the roof to the other keeping a continuous wet edge. Follow all label directions.

### Coverage: 2 Coats

Porous surfaces including foam, concrete, tile, roll roofing, and previously coated surfaces.  
50-60 sq/ft per gallon.
